### Expert coach speaks

*Elocution is the study of formal speaking in pronunciation, grammar, style, and tone as well as the idea and practice of effective speech and its forms. It stems from the idea that while communication is symbolic, sounds are final and compelling.*

*In the 19th century, tongue twisters were developed by elocution experts to help people improve their speech. Tongue twisters force speakers to practise the consonant sounds essential to clear elocution and to work on speaking words aloud quickly and clearly.*
