Self-Learning Manual: Activity 09

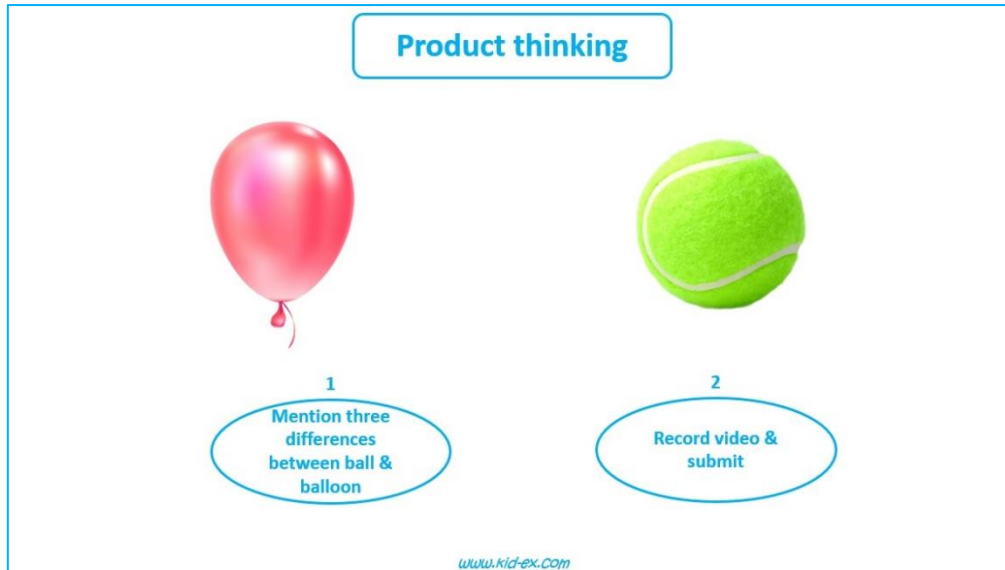

Cognitive skills:

Product

Age: 3 years

Our sponsors

Activity description

The child is required to call out three differences between a ball & a balloon.

The idea behind the activity is to help the child think about differences between two similar objects/things which sets the thinking platform for judging pros & cons in subsequent years. At an early age, ball, football, balloon etc. may all be considered as similar objects.

The child should call out 3 differences between ball & balloon.

Record a video of the child sharing her/his views and submit it as per the guidelines.

Assessment guidelines

The total non-bonus points for this activity is 30. Every submission would be rated as either of below.

M = Master
(100%)

The child can call out three correct differences between the two objects.

The child can call out two correct differences between the two objects.

I = Intermediate
(80%)

B = Beginner
(50%)

The child can call out one correct difference between the two objects.

For participating in the event & making an event relevant submission which does not meet assessment guidelines for M, I or B.

A = Aspirant
(25%)

NA (Not applicable)

No submissions or any submission which is irrelevant for the activity.

50% bonus marks: If the child securing an M can share three similarities between the two objects as well & cover all the six points (3 differences & 3 similarities).

Expert coach speaks

Toddlers of today will be the biggest users of technology tomorrow. They would not just be users but demanding users.

For the same, it is important that the user can compare options, understand the subtle difference amongst objects. As a kid, it begins with not apps/software but toys & kids' world items. This activity nudges that thought process in the kid's world.

Key benefits of this activity

The activity benefits in many ways:

- Develops cognitive skills through comparing and contrasting
- Improves logic
- Promotes fact finding
- Triggers structured thinking
- Teaches communication

Common mistakes to avoid

- *Lacks curiosity / does not question things*
- *Unable to spot the difference despite guidance*
